CHAPTER 22
REVIEW MEETING

Now then...

I would like to hold the first comprehensive review meeting for the maintenance team.

Okay...

After an unexpected end to the mock battle, resulting from exhaustion of mind...

Actually, Bru... don't you think everyone is uneasy mainly because of that...?

I understand how everyone feels, but right now, we should pick ourselves up and closely examine the problems.

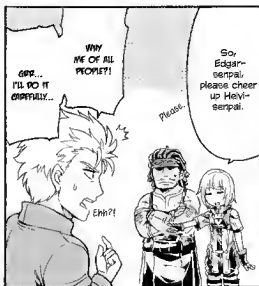

Well,
she got
all worked
up, but her
fight suddenly
came to an
end due to
mana ex-
haustion...

She
probably
would've felt
better if she
actually lost
while fight-
ing...

God...
I'll do it
carefully...

WHY
ME OF ALL
PEOPLE?!

Please.

So,
Edgar-
senpai,
please cheer
up Hevi-
senpai.

But
having
the problems
come to light
is an achieve-
ment in it
of itself.

Come
out alive,
Edgar...!

WHAT
THE HELL?! I
DON'T NEED
ANY PITY!
ESPECIALLY
FROM YOU!

Hey,
Helvi...
don't be
so down.

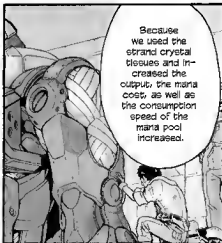

It's obvious
that the mana
consumption's
gone up relative
to the output
increase.

Now,
after seeing
what happened,
the problem
is simple.

Furthermore,
because we
made it easier
to use silhouette
arms, the mana
usage for that
has increased
more than
anticipated
as well.

Because
we used the
strand crystal
tissues and in-
creased the
output, the mana
cost, as well as
the consumption
speed of the
mana pool
increased.

Yeah,
it's really
bad. I almost
think it might
be fatal....!

Hey,
you
actually
look
like
you're
enjoying
yourself
right
now!

Considering
the various
factors, the
operating time
might be roughly
half of what it
was before...

That's
bad...
Isn't
it?

So the poorly
made points of
remodeling have
come front and
center, haven't
they...? We're
lacking the
mana supply
to keep up
with the con-
sumption.

That's
why it's
that much
harder to give
it half baked
improvements.

For starters,
the silhouette
knight is the
result of long
years of im-
provement. The plans
have been made
to maximize
its usage to
the limit.

Right?

Right?

I see...
Right...
You're
right!

It
doesn't
have to
be... In the
form... of
a human...

THAT'S
SO MEAN!
WHY DO SAY
THAT?!

While
that is
true, being
told that by
Addy is, how
should I say
this... very
frustrating.

I don't
know

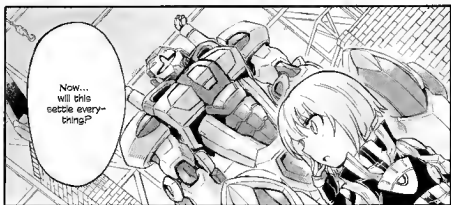

CRYSTAL
TISSUE.

SILVER
NERVE.

In other
words, we can
increase them by
connecting them
to silver nerves
and loading
them to open
spots.

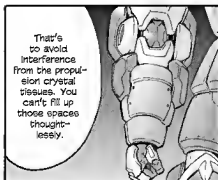

I see!
Even if we
increase the
amount of
crystal tissues,
we don't have
to move
them.

Yes, I'm sure they'll be able to make more specialized items for mana pools from here on out.

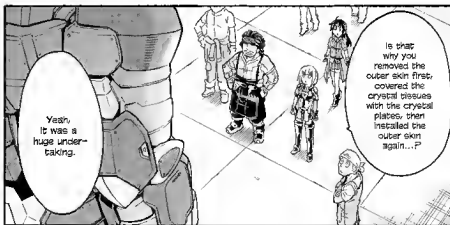

"Crystal plate"... Those guys at the alchemy department did a good job.

That's to avoid interference from the propulsor crystal tissues. You can't fill up those spaces thoughtlessly.

But having said that... I was planning to install them on the inside of the armor, but there was less space than I thought.

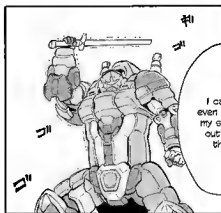

Yeah, it was a huge undertaking.

Is that why you removed the outer skin first, covered the crystal tissues with the crystal plates, then installed the outer skin again...?

I can't
even swing
my sword
out like
this!

Hey...
this guy's
way too
heavy.

Oh... Ohh---!

DAMN IT
ALL! WE HAVE
TO MAKE IT
"THINNER"
THIS TIME!

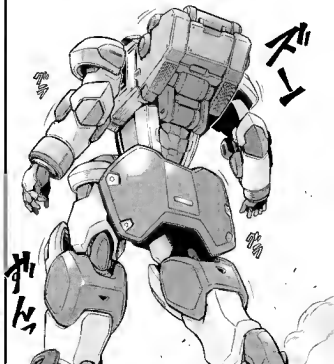

Then,
you want
to make the
crystal plate
masses ex-
ternal... and
have them
carry it?

But with
that alone,
the crucial
point of im-
proving the
mana pool
would be...

If we
limit the
points of
the composite
model armor,
we should be
able to keep
the weight
down.

And if we
remove the
back weapon,
there's no
point in the
new model!

That
would put
the center
of gravity in
the back and
make it ex-
tremely hard
to move
around...

All we
can do is
look for com-
promises and
do everything
we can for
now.

Having
said that,
I believe we
have all the
factors re-
quired to
complete
this.

TRY TO
SHOW JUST
A SHRED OF
RESTRAINT!!

IT'S ONE
THING AFTER
ANOTHER! WHY
IS THIS UNIT
SO "NEEDY"?!

If you would... But, is that thing really that amazing?

I'll send word if there are any other activities.

It's all here.

Here's your ale.

All right, here it is.

...So he says, leader.

Yeah... It's not something as cute as some boy made by students, that "prototype"...

An
unknown
"prototype",
huh...

That's
sounds
interest-
ing.

Darkness draws near. What lies ahead for Eru and the gang's prototype?
